Identification of the items to which this declaration applies

FORCE bottle models in different volumes and colours under the brand name:

PARTY RIDE

DIRTY ROAD

Used materials

The bottle body is made of polyethylene and the bottle cap is made of polypropylene

Specifications of the intended use or limitations

Type of food intended to come into contact with the material:

Aqueous media, pH Value 2-8

Cold drinks (not under 0 degrees) and warm drinks (up to 40 degrees)

The drink should not be in the bottle for more than 24 hours

Type of food/drinks or processes not intended to come into contact with the material

Fatty or oily substances

Microwave use

Products comply with legislation

The products comply with the legal regulations laid down in the European Regulations of Plastic materials as well as Regulation EC No 10/2011 (plastic getting in contact with food) and EG1935/2004, both in their relevant versions and produced according to Commission regulation (EC) No 2023/2006.

When used as specified, the overall migration does not exceed the legal limits. The test was performed according to the Directive 82/711/EEC and 85/572/EEC.

The materials and raw materials used in the manufacture of the plastic materials comply with the European commodity Ordinance (or the respective stipulations laid down in the European Regulation 2011/10.) up to and including the amendment (EU) Regulation No 321/2011.

The following substances subject to limitations and/or specification are used in the above mentioned product

No substances subject to limitations

Dual-use substances

The following dual use substances are present in the lids of the bottles

E211 Sodium Benzoate

E471 Mono- and diglycerides of fatty acids

These substances that are also used as food additives or flavourings have no migration limit.

Ratio of the area of the food contact material to the volume used to determine the compliance of the plastic food contact material or article

Migration was determined by following BS EN 1186-3:2002 in accordance with EEC directive 2002/72 and its amendments. The migration limit in the case of plastic materials or articles, is 6 milligram per square decimetre of the surface area of the plastic material or article tested.

In particular it is emphasized that in case of printed material, no contact is allowed between the printing ink and the food product. For the printing we use low migration ink.

In above mentioned Product no functional barrier from plastic is used.
